Applicant's or agent's file reference FU 01 P002WO	IMPORTANT NOTIFICATION
International application No. PCT/EP2004/005603	International filing date (day/month/year) 25 May 2004 (25.05.2004)
Applicant FUCHS PETE	ROLUB AG et al
Transmittal of the translation to the applicant.	
The International Bureau transmits herewith a copy of the patentability (Chapter I).	ne English translation of the international preliminary report on
The International Bureau transmits herewith a copy of the patentability (Chapter II).	e English translation of the international preliminary report on
2. Transmittal of the copy of the translation to the designated or	elected Offices.
The International Bureau notifies the applicant that copies of that Offices requiring such translation:	translation have been transmitted to the following designated or elected
KR	
The following designated or elected Offices, having waived the retranslation from the International Bureau only upon their request:	equirement for such a transmittal at this time, will receive copies of that
EE, EG, EP, ES, FI, GB, GD, GE, GH, GM, HR, HU, ID,	, BY, BZ, CA, CH, CN, CO, CR, CU, CZ, DK, DM, DZ, EA, EC, , IL, IN, IS, JP, KE, KG, KP, KZ, LC, LK, LR, LS, LT, LU, LV, MA, DM, PG, PH, PL, PT, RO, RU, SC, SD, SE, SG, SK, SL, SY, TJ, ZM, ZW
3. Reminder regarding translation into (one of) the official langua	age(s) of the elected Office(s).
The applicant is reminded that, where a translation of the internat must contain a translation of any annexes to the international prelim	ional application must be furnished to an elected Office, that translation minary report on patentability (Chapter II).
It is the applicant's responsibility to prepare and furnish su applicable time limit (Rule 74.1). See Volume II of the PCT Ap	ch translation directly to each elected Office concerned within the plicant's Guide for further details.

International application No.
PCT/EP2004/005603

Box No. V

Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement

an evaluation unit (22) for evaluating the measuring signal.

The measuring device is arranged on a line leading away from a storage tank, D1 not specifying what lies at the other end of the line.

Claim 1 is directed to a machine, for example the engine of a motor vehicle, comprising a filler pipe for a service fluid, namely lubricating oil, engine oil or hydraulic fluid, into which a measuring device such as that described in D1 is integrated such that when filling the machine with the surface fluid through the filler tube, said fluid at least partially fills or flows through the measuring section.

It is therefore possible to recognise if the machine is being filled with an unsuitable service fluid or to optimise the change intervals for the surface fluid as a function of the service fluid with which the machine is filled.

D1 does not suggest integrating the device described therein into a machine.

Document D2 discloses a measuring device such as that described in D1, figure 1 clearly showing that the measuring device is arranged on a line that leads from a storage tank to a motor vehicle.

D2 refers exclusively to fuel substances and not

PCT/EP2004/005603

Box No. V

Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement

to service fluids such as engine oil. Therefore at best, D2 could prompt a person skilled in the art to integrate the measuring device described therein into the tank of a motor vehicle such that when filling the vehicle with the fuel through the filler tube of the tank, the fuel passes through the measuring section.

D2 does not suggest integrating the measuring device described therein into a machine so as to measure a service fluid, for example into the engine of a motor vehicle.

The machine as per claim 1 is therefore considered novel and inventive (PCT Article 33(2) and (3)).

Independent method claim 9

Claim 9 is directed to the use of the device described in claim 1 and is therefore, *mutatis mutandis*, also novel and inventive.

International application No.
PCT/EP2004/005603

Box No. VII Certain defects in the international application

The following defects in the form or contents of the international application have been noted:

Contrary to PCT Rule 5.1(a)(iii), the description is inconsistent with the claims.

Contrary to PCT Rule 5.1(a)(ii), the description does not cite documents D1 and D2 or indicate the relevant prior art disclosed therein.
